

## UT 1 - Calculadora simple

"La función de un buen software es hacer que lo complejo aparente ser simple"

Vamos a crear una calculadora como la que muestra la imagen.

The image shows a screenshot of an Android application titled "Calculadora". The app has a dark header bar with the Android logo and the title. Below the header, there are two input fields labeled "Opcion 1:" and "Opcion 2:". Below these fields, there are four buttons for arithmetic operations: "+", "-", "\*", and "/". At the bottom, there is a label "Resultado:" followed by a large empty space for the result.

Calculadora

Opcion 1:

Opcion 2:

+ - \* /

Resultado:
